

# SecureQuote

SecureQuote is a new and innovative web-based tool targeted specifically at screen manufacturers to improve efficiency, productivity, sales, and profit.

Built from the ground up and based on one of the market-leading window and door estimating and quoting platforms, SecureQuote removes the complexities involved in window and door estimation and adds features and functionality essential for retrofit and new-build screen manufacturing and installation.

To enquire about this software or arrange a demonstration, please contact your Capral Account Manager or local Capral sales office.

## Key Features & Benefits

### Customer Management

- Create and manage clients and contacts

### Quotations

- Quick and easy selection and configuration of sliding, hinge and window screens using fly, barrier, and security solutions.
- Add outer frames to your screens, including angles, sliding tracks and hinge door adaptors.
- Built-in 3D viewer with the ability to see cut-throughs
- Add any additional extrusions, components, labour items, etc on the fly (Freehand items).
- Set your default margin, which can then be adjusted in each quote.
- Professional quotation, which can be branded with your own company details and logo.

### Costing

- Includes your unique costs from Capral
- Extrusion optimised across each quotation.
- Stainless and perforated sheets can be optimised across multiple sheet sizes within each quote.
- Custom configurable pricing for non-Capral sourced materials

### Reporting

- Professional-looking and functional reports. Your own company logo can be added to the Quote Report.
- Includes Quotation, Fabrication Sheet, Costed BOM and Cut Plan

### Customisation

- Add your company details and logo to the Quote Report.
- Ability to configure cutting defaults (end trim and kerf), margin defaults, non-Capral costs and optimisation settings

### Access

- Built on the cloud, SecureQuote is accessible from the factory, office, home, or anywhere you have internet access.
- No installation is required, with updates applied automatically.
- Any number of users from your company can access the same quote database. You could have a user quoting in the car and another accessing the exact quote in the factory.
- Charges are based on a monthly subscription per user.
